

August 5, 2015

To Whom It May Concern:

The Dannon Company, Inc. is committed to not using milk from cows treated with rBST (recombinant bovine somatotropin), a synthetic hormone that is safe and is approved for use by the U.S. Food and Drug Administration.

Dannon does not use fluid or condensed milk from cows treated with rBST in response to consumers' preference for rBST-free milk and dairy products.

rBST is also sometimes referred to as "rBGH" or "recombinant bovine growth hormone."

Sincerely,
The Dannon Company, Inc.
