

## SHELF LIFE

Product has a 30 month shelf life from the date of manufacture, if stored properly.

Use product within 21 days of beginning of thaw and keep refrigerated.

## YOCREAM PRODUCT MANUFACTURING CODE

YoCream products are printed with the following information on the carton gable: name of flavor, expiration date (yyymmdd), manufacturing tank/filler-line identification, allergen statement (if applicable). Similar information is printed on the product case.

## YOCREAM® FROZEN YOGURT HANDLING INSTRUCTIONS

### STEP 1

Check for damage. Do not accept damaged cases. Handle product with care. Dropping or throwing the case will cause damage to inner contents and can cause leakage of the product.

### STEP 2

To store product in frozen state, maintain temperature at 0° F or less. Product has a 30 month shelf life from the date of manufacture, if stored properly.

### STEP 3

Cases may only be stacked to a maximum of 6 cases high. Pallets may not be double stacked—cases and contents are fragile and can be crushed. Overstacking can cause leakage of the product.

### STEP 4

To thaw, place product **in a refrigerator** at 33-41° F for approximately 3-4 days. Keep refrigerated and use product within 21 days of beginning of thaw (the day the case is taken from the freezer and put in the cooler).

### STEP 5

Shake product well before opening. When opening the cartons, do not touch the rim where the product is poured. Under no circumstances should any object or any part of a person's body come in contact with the product.

### STEP 6

To ensure freshness of product use the "First in-First out" rule: use in "Thaw Date" order. Use product that was thawed first and the rest in date-thawed order. On the side panel of each carton, there are boxes to enter "Thaw Date" and calculate 21 days out to enter in "Use by Date".
