YoCream defines custom manufacturing as an offering of world class services related to the manufacturing of fine food products which provides our customers an unmatched level of confidence and competitive advantage. Contact us today to discuss your needs or to schedule a plant tour.

THE YOCREAM INTERNATIONAL DAIRY & MANUFACTURING PLANT

YoCream International has been producing fine products at its Portland, Oregon dairy and manufacturing plant since 1987. As an established food service vendor and co-packer of dairy and non-dairy products, YoCream International provides expertise to the custom manufacturing and private labeling market. YoCream co-packs products for both emerging and established companies. In addition to manufacturing, clients may also contract the use of the Company's Research and Development and Logistics departments.

The versatility and flexibility of the manufacturing facility enables production ranging from smaller batches, for test market and product development runs, to large scale production.

MANUFACTURING LINES

The manufacturing plant has three distinct packaging operations that can be simultaneously operated based on demand. Products can be packaged in a multitude of packaging sizes, styles, and finished casings.

Gable-Top Pure Pack Filler Line *Soft serve mixes, liquid products, products for fresh or frozen delivery*

CERTIFICATION

A fully licensed dairy, YoCream pasteurizes under USDA certification and inspection and under organic certification. Both organic and non-organic products can be processed and packaged simultaneously while maintaining separation. YoCream products are Kosher certified through an established relationship with Kosher Overseers Association.

MANUFACTURING PRACTICES

Food safety is a primary focus at YoCream International. The Company's Food Safety and Quality Assurance Department ensures the most stringent levels of regulatory compliance are maintained, meeting and exceeding all inspection standards including but not limited to USDA, FDA, military, customer food safety audits, aseptic processing standards, export requirements, kosher and organic certification. Some of the Company's food safety protocols include:

Hazard Analysis & Critical Control Point (HACCP)
Microbiological Testing & Control
Quality Systems
Hold and Release Policy
Traceability & Recall

Educational Training
Allergen Control
Supplier Approval
Pest Control
Regulatory & Compliance
Biosecurity
